

A twin-engine propeller aircraft, white with blue stripes and "CORPORATE AIR" written on the side, is parked on a dark asphalt tarmac. In the background, a modern airport terminal with large glass windows and a dark roof is visible. The sky is a mix of blue and orange, suggesting sunset or sunrise. A tall light pole stands near the terminal.

**Front cover image: Armidale Regional Airport, Regional Tourism Infrastructure Fund**

The Restart NSW Fund is the NSW Government's dedicated infrastructure fund which was established in 2011 to improve the economic growth and productivity of the state. Approximately \$33.2 billion has been deposited into the Restart NSW since 2011 as a result of the government's asset recycling program and investment earnings, with \$23.7 billion of that now committed to infrastructure projects and programs across NSW\*.

Infrastructure NSW has sole responsibility under the Restart NSW Fund Act for making recommendations to the NSW Government for use of the funds, which include:

- » Major NSW government-led projects which will improve the productivity and competitiveness of the state across all sectors; and
- » Local and community infrastructure projects managed by councils, non-government organisations and other agencies, the majority of which are recommended for funding following a submission-based competitive process.

This booklet reports on local and community infrastructure projects.

Thirty per cent of all Restart NSW funds are to be committed to projects in regional NSW (outside Newcastle, Sydney and Wollongong), and many of the Restart NSW local and community infrastructure funding programs are aimed at delivering projects in these areas.

Restart NSW local and community infrastructure projects include vital upgrades to rural and regional road and rail networks, the development of infrastructure to boost tourism, projects which address infrastructure constraints in mining communities, the provision of safe and reliable water services, and infrastructure which drives economic growth and productivity.

There are currently more than 500 projects which have been allocated \$1.4 billion through the Restart NSW local and community infrastructure funding programs. The total project budget for these is more than \$2.2 billion. Many of these are active projects, and new projects are being assessed regularly.

---

# Restart NSW Funding Programs

---

Infrastructure NSW works closely with various other NSW Government agencies to assess and recommend infrastructure projects under a number of targeted funding programs. These programs include:

## **FIXING COUNTRY ROADS (INCLUDING FIXING COUNTRY TRUCK WASHES)**

In recognition of the important role freight plays in the regional economies of NSW, \$543 million has been reserved to help local councils repair and upgrade regional road networks and conduct road-related projects throughout the state as part of the Fixing Country Roads program. To date, funding has been awarded to more than 200 projects, including truck wash upgrades under the Fixing Country Truck Washes program and a number of bridge assessment programs. Applications for Fixing Country Roads remain open.

## **FIXING COUNTRY RAIL**

Fixing Country Rail aims to relieve bottlenecks by upgrading parts of the regional rail network constraining efficient freight network. Projects include sidings, passing loops and network upgrades, allowing the use of faster, longer or heavier trains. More than \$138 million has been awarded to projects across the state.

## **REGIONAL GROWTH FUND – RESOURCES FOR REGIONS**

Resources for Regions has awarded \$268 million to councils and other organisations for more than 50 projects since 2012 to help construct and improve infrastructure in mining-related communities throughout regional NSW and in Newcastle and Wollongong. Successful projects contribute to the health, water, road, education and tourism sectors and help stimulate economic growth and boost local economies.

## **REGIONAL GROWTH – ENVIRONMENT AND TOURISM FUND**

In recognition of the significant benefits tourism provides to regional NSW, the Regional Growth – Environment and Tourism Fund supports projects which increase tourism visitation through investment in regional environment and tourism infrastructure. This helps to diversify regional economies. More than \$116 million has been awarded to projects so far, including nature walks, historical sites, cultural centres and a koala hospital.

## **REGIONAL GROWTH FUND – GROWING LOCAL ECONOMIES**

As part of the NSW Government's Regional Growth Fund – Growing Local Economies is designed to unlock the growth potential of local economies by supporting projects of economic significance which will deliver long-term growth benefits. Projects support local procurement, job creation and skills development and approved projects to date include industrial land activations, a pilot biorefinery and a number of major road upgrades.

## **SAFE AND SECURE WATER**

Following on from the successful Water Security for Regions Program, the \$1 billion Safe and Secure Water program recognises the pivotal role water security and sewage services play in regional prosperity and long-term growth. Funding is recommended for detailed planning and construction activities to install, replace, augment or decommission water and wastewater infrastructure.

## **HOUSING ACCELERATION FUND**

The Housing Acceleration Fund, managed by the NSW Department of Planning and Environment, delivers critical enabling infrastructure to stimulate and accelerate housing development in NSW.

## PREVIOUS PROGRAMS

### REGIONAL TOURISM INFRASTRUCTURE

This \$110 million Regional Tourism Infrastructure Fund supports regional tourism by contributing to critical visitor economy infrastructure projects such as rail trails, airports and cruise terminals. Improving this infrastructure helps attract more visitors to regional NSW, making it a more attractive place to live, work and visit.

### HUNTER INFRASTRUCTURE AND INVESTMENT FUND

Established in 2011 and managed by the Hunter Development Corporation, this fund aims to enhance the Hunter region's infrastructure, including transport, education, water and health, to support economic growth and enhance the liveability of the region.

### ILLAWARRA INFRASTRUCTURE FUND

Twelve infrastructure projects across the Illawarra have been allocated \$100 million, funded by proceeds from the long-term lease of Port Kembla. These projects include aged and healthcare facilities, a technology hub, facilities for people with disabilities, pedestrian and cycle links, road links and tourism infrastructure.

### COBBORA TRANSITION FUND

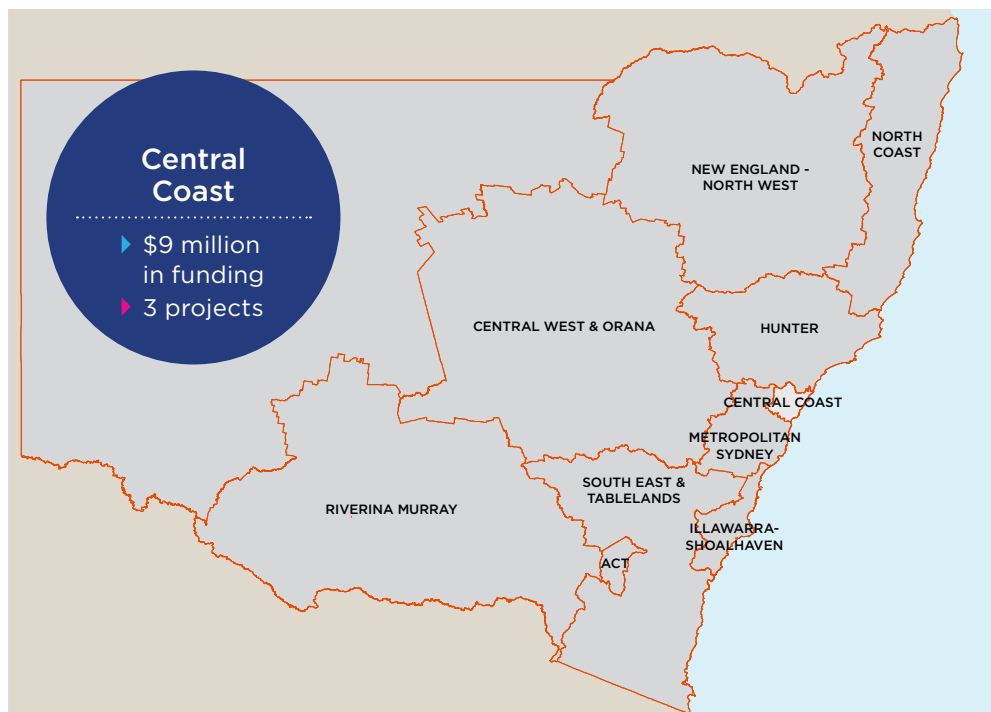

Established in recognition of the impact of land acquisition and other activities the Cobbora Coal Project had on local communities in western NSW, the \$20 million Cobbora Transition Fund has provided funding to projects such as health care, roads, tourism and recreation. Each project boosts the regional economy and creates local employment opportunities.

### WATER SECURITY FOR REGIONS

Improving water security by helping communities prepare for drought conditions has always been a priority for the NSW Government, which is why almost \$220 million has been committed to augmenting dams, constructing pipelines and bores, upgrading treatment plants and increasing water efficiency under the Water Security for Regions Program. Projects in regional towns affected by ongoing water quality and sewerage program were also awarded funding for new builds and infrastructure upgrades.
